

ABSTRACT OF THE DISCLOSURE

A table top for a patient trolley or gurney is provided with a removable armrest. The armrest is mounted on the table top by having an insertion piece received in an insertion opening on the edge of the table top. In the preferred embodiment, the table top has a plurality of insertion openings in the form of slots spaced along the edge of the table and the armrest has two sets of insertion pieces, with each set having a pair of insertion pieces extending at right angles to each other, so that the armrest can be mounted extending vertically relative to the plane of the table top or parallel to the plane of the table top.
